

To discover what Juvéderm can do for you, and why you should put your trust in Juvéderm visit www.juvederm.co.uk and consult a medical practitioner.

When you
adore the
skin you're in,
you glow.

SKIN-QUALITY INJECTABLE

VOLITE®

┌ Skin. We tend to think of it only as a mirror that reflects our lifestyle from the inside out. But in fact, it's an indicator of our emotional health, affecting us from the outside in. When our skin looks good, we feel great. And when it changes, so can the way we feel about ourselves. Find the right treatment for your skin, so that it looks more like you think it should on the outside - so you can feel more like you on the inside.

When you have radiant skin, you feel happy and look energised.

INTRODUCING SKIN QUALITY

The quality of our skin is linked to inner vitality and good lifestyle. Sleep, a healthy diet and exercise all play a part in keeping our skin looking and feeling its best. But a number of external factors – such as pollution, weather, and air conditioning – can also negatively impact the skin to different degrees.

Physiological factors, like ageing or genetics, also contribute to specific skin concerns like wrinkles, loss of elasticity, or roughness.

So, what does a good skin day look like? Following research with Healthcare Professionals, the idea of what makes for 'good skin' is based on these three things:

Texture – Skin that is hydrated and lacking in fine lines

Elasticity – Skin that is firm and supple

Colour – Skin that is not pigmented or red

Learn to love your age,
with beautiful, revitalised
skin that loves you back.

JUVÉDERM'S SKIN-QUALITY INJECTABLE

Our Skin-Quality Injectable is a minimally invasive injectable treatment, which delivers hyaluronic acid (H.A.) directly into the skin to improve its hydration and elasticity, in addition to the appearance of fine lines.

H.A. is a naturally occurring substance in the skin. When H.A. is delivered into the skin, with Juvéderm, it combines with the water in your skin to hydrate, improve elasticity and help remove fine lines. H.A. fillers are recognised to bring benefits to the skin; they may stimulate collagen production, leading to an improvement in overall skin quality.

Our Skin-Quality Injectable requires only one treatment, and is designed to last for up to six months. It can be used for the hands, face, neck, and décolletage. You may need a touch up after your treatment, so a follow-up consultation with your medical practitioner is always recommended.

91%

OF PATIENTS IN OUR CLINICAL STUDY WERE MORE SATISFIED WITH THEIR SKIN AFTER TREATMENT

HOW CAN TREATMENT IMPROVE SKIN QUALITY?

Juvéderm's Skin-Quality Injectable visibly improves elasticity and hydration, in addition to the appearance of fine lines across four key areas:

ELASTICITY

Crepiness

By plumping and hydrating crepey skin that appears saggy, due to lack of tone and moisture

TEXTURE

Dryness

By hydrating dry skin that appears flaky, irritated and dehydrated, and feels rough and scaly when touched

Roughness

By smoothing roughness in the skin

Skin Depressions

By evening out depressions and roughness in the skin

Your skin is unique,
so your treatment
plan is too.

WHAT TO EXPECT DURING TREATMENT

Your medical practitioner will begin the treatment process with a skin assessment, to create a bespoke treatment plan to help you achieve your desired outcome.

Juvéderm's Skin-Quality Injectable delivers visible results with just one treatment. During the treatment your medical practitioner will make multiple injections across your chosen area with a very fine needle. To ease any discomfort you may feel during the process, our formulation includes the anaesthetic, lidocaine. You may need a touch up after your treatment, so a follow-up consultation is always recommended.

Maintaining results – Juvéderm's Skin Quality Injectable is designed to reduce fine lines and improve skin hydration and elasticity for up to six months. Speak to your medical practitioner about how to maintain your results, and when you should book a follow-up treatment.

96%

OF PATIENTS IN OUR CLINICAL STUDY HAD
IMPROVED SKIN QUALITY AFTER TREATMENT

Faye, 35

“When I look in the mirror I feel quite fresh, and I feel like I don't need to put any make-up on.”

Anna, 45

“I've been using less moisturiser definitely!”

Lynda, 66

“I've noticed my skin is much plumper, it's certainly more glowing. I find I don't have to put on too much blusher and foundation anymore.”

Beautiful features
that work in harmony,
not isolation.

THE JUVÉDERM RANGE

Our range of Juvéderm products have been designed to give you the look you desire. While there may be a particular area of the face that you wish to treat, the three classic tenets of beauty - symmetry, balance, and harmony - are all influenced by how well our features work in combination. Therefore, we recommend that you keep the look of your full face in mind when considering a treatment.

Many women benefit from having an overarching, whole-face aesthetic treatment plan, based on their individual goals.

Speak to your medical practitioner today to see how Juvéderm products can be used holistically to enhance your features through filling, hydrating, shaping and contouring.

32.7 million / TREATMENTS FROM JUVÉDERM,
THE WORLD'S LEADING H.A. BRAND

ALLERGAN MEDICAL AESTHETICS

Juvéderm is made by Allergan, a global health care company that pioneered the development of medical aesthetic treatments over 35 years ago. Inspired by a long heritage of quality, science and innovation, Juvéderm products are made using advanced technology, have a good safety profile and provide natural looking results that last up to 18 months, depending on the chosen treatment. Our philosophy is simple: to provide you and your physician with clinically proven, high-quality facial treatments that satisfy your expectations and which you both can trust. That's why Allergan's heritage in aesthetic treatments is supported by more than 32.7 million treatments from Juvéderm, the world's leading H.A. brand.
