

Blue Peel RADIANCE may be ideal for use with other Obagi products

Results may be enhanced on the face and décolletage by combining Obagi products:

- **Optimize** – Lay the foundation for an even, more visible outcome with the Nu-Derm® System, 4 to 6 weeks prior to and following your first peel³
- **Prepare and Complement** – May aid the performance of other Obagi systems

Consult with a physician on which products may be best for you.

Talk to your physician today about bringing out your inner glow, with new Blue Peel RADIANCE.

Ready to look and feel radiant?

Then you're ready for
Obagi® Blue Peel RADIANCE™,
the in-office peel that gives you
instant, glowing results.

**Blue Peel
RADIANCE™**

Bring out *your* inner glow.

Reveal a new layer of beautiful skin with Blue Peel RADIANCE

What is a chemical peel?

A superficial chemical peel is a minimally invasive procedure in which an acid-based solution is applied to the face or décolletage to remove dead skin cells. After several minutes, the solution is removed, revealing smoother, more refined-looking skin.¹

A chemical peel can improve skin problems ranging from sun spots to acne scars, as well as improve skin texture and tone.²

Blue Peel RADIANCE— instant, glowing results for most skin types

What to expect

- Formulation achieves instant, glowing results
- Tighter, smoother, brighter-looking skin after just 1 peel*
- Quick and easy in-office procedure with little to no downtime

Product is not intended for home or unsupervised consumer use. To be used only by a licensed medical professional (a physician, or an aesthetician or nurse under a physician's supervision).

*A series of 4 to 6 peels provides best overall results.
