

Epionce Peel System

Simple. Effective. Proven.

The Epionce Peel System is an in-office treatment that helps stimulate cell turnover, rejuvenate the skin and accelerate the healing process. Infused with botanical extracts, you'll see smoother, clearer and more radiant skin - *with minimal downtime.*

BENEFITS OF THE PEEL

Improves skin aging

Helps reduce the visible appearance of fine lines, wrinkles, uneven texture and hyperpigmentation (sun spots). System can be combined with other treatments such as light microdermabrasion to achieve optimal results.

Addresses skin conditions

Helps diminish acne, rosacea and pre-cancers (actinic keratoses).

Minimal downtime

Return to your normal daily routine immediately post-procedure. Mineral makeup may be worn right away.

PEEL SYSTEM Q & A

Is the Epionce Peel System right for me?

The Epionce Peel System is suitable for most skin types and conditions. Consult with your skin care expert to decide if the Epionce Peel will help you meet your desired skin care goals.

When will I see results?

You may notice positive changes in your skin after just one treatment. However, depending on your skin care goals, achieving your optimum result may require a series of treatments. Your skin care expert can suggest a treatment series and home care regimen that will best benefit your skin.

Will my skin peel?

You may experience light flaking or peeling, similar to sunburn, up to one week post-peel. It is normally easy to cover with light mineral makeup, if needed.

How do I care for my skin after the procedure?

The Epionce Skin Barrier Repair Kit and Enriched Firming Mask provide an immediate post-peel regimen. After your peel series is complete, your skin care expert can assist you with selecting the right Epionce home products that will help keep your skin looking great.

Do I need to use Epionce at home?

Taking good care of your skin is a team effort between you and your skin care expert. Optimal results from the peel come from a combination of your Epionce home care regimen and peel series. Using Epionce products daily builds barrier strength and protection, and prepares your skin for better healing after a peel.
